

Munkedals Manor

Munkedals Herrgård is located centrally in Bohuslän, just an hour away from Gothenburg! Here, we offer exciting fishing in both rivers and lakes. Örekilsälven is one of Sweden's best salmon fishing waters, and from our facility, you can hear the rushing water. You will stay in a beautiful manor environment with origins from the early 1800s. With the sea and forest nearby, our experienced kitchen team offers locally sourced and flavorful dishes based on the season's offerings. All our rooms are individually decorated in a romantic manor style, and the bathrooms have a shower and hygiene products.

Season

Salmon fishing in Örekilsälven (May 1 to September 15). Pike and zander fishing in Kärsjön, Viksjön, or a private lake (March to October).

Species & Records

Here, you will stay in a beautiful and historic environment while being offered exciting fishing in both rivers and lakes. Örekilsälven is one of Sweden's best Atlantic salmon rivers, and the manor is only a stone's throw from the riverbank. There are many lakes on our property, giving us the opportunity to create beautiful nature experiences and great fishing for you.

Fishing Service

Several of the lakes have a good supply of pike, perch, and zander. On our private property, there is the possibility of fishing in lakes with very low fishing pressure, where we guarantee to be the only ones on the lake, which increases the excitement and chance of catching something! We offer both fishing packages with professional guidance and fishing on your own.

Location & Transfer

We are located around 100 km north of Göteborg, just outside the village of Munkedal near river Munkedalsälven. By car the trip from Göteborg takes around an hour. The Munkedal train station is 4 km away, we can arrange to pick you up there.

Equipment & tactics

The salmon fishing in Örekilsälven is done with spinning and fly fishing. The summer lake fishing is done with spinning gear from a boat. Fly fishing for rainbow trout is also an option at our scenic Harkerudsjö. Ice fishing for rainbow trout, pike, and perch is conducted with angling, ice fishing, or jigging. The necessary equipment is available for borrowing as needed.

Regulations

All fishing is essentially “catch and release,” except for occasional trophy or food fish. However, all salmon and trout under 45 cm must be released.

Other activities

Combine your fishing experience with other activities that we offer. There are beautiful hiking trails throughout the municipality, including the popular Bohusleden. You can also book paddling packages, golf packages, or combine your stay with a whisky tasting!

Languages

At our facility, we speak Swedish, English, and Polish.

Additional info

We welcome all angler to the inland waters of west Sweden and the rapids of river Örekilsälven!

Accommodation

Munkedals Herrgård is located on the west coast between Gothenburg and Oslo, with a history dating back to the early 1800s. There are a total of 28 beds divided into 15 rooms. Upstairs, there is a newly renovated large public balcony where you can sit and enjoy a coffee in a quiet, undisturbed environment with views of lush forests and beautiful lawns. We offer both single and double rooms in both the manor house and the annex. The rooms are decorated after various personalities who have had a significant impact on the history of the estate and manor. In our historic Manor Restaurant, you can relax and enjoy the dishes we serve without stress. Hunting is very important to us. Working with fresh meat/game that has been hunted in the local area allows us at Munkedals Herrgård to put our own stamp on cooking.
