

Rörströmsälven Jakt & Fiske

The facility comprises two base camps. Camp 1 is located by Lake Lesjön downstream of the Hocksjöforsarna Rapids. Camp 2 lies upstream and is a true wilderness site in a Natura 2000 area and next to a nature reserve without road, electricity or utilities. It offers fishing in the peace and quiet of the backwoods.

Season

The facility is open all year, though fishing for pike and perch is best from May through September. Grayling and brown trout in the rapids is open June through August, while the Hocksjö lakes are open for trout and char fishing all year.

Species & Records

Pike, perch, grayling, brown trout, char, lavaret, ide, bream, burbot and roach. We have no statistics, but there is documentation on pike catches at 13 kg, perch at 2.7 kg and trout at 9.2 kg. These are truly virgin waters!

Fishing Service

A Linder 440 4.4-meter boat with a Suzuki 4 hp, 4-stroke motor. We transport the boat to the lake you have chosen. Guide service. Possible to hire or buy fishing equipment. There is a restaurant or we can cook your meal where you are.

Location & Transfer

The facility is located along the Rörströmsälven River around 170 km north of Östersund/Åre Airport and 200 km northwest of the Sundsvall/Härnösand Airport.

Equipment & tactics

River Rörströmsälven runs through and past innumerable lakes where there is currently almost no fishing at all for either pike or perch. Spin fishing with large wobblers is best for pike. In the Hocksjöforsarna Rapids you need fly-fishing to catch grayling and brown trout. We stock the Hocksjö lakes annually with trout and char – you can actually reserve your own lake. Ice fishing for char in March/April is recommended.

Regulations

Only one medium-sized pike is allowed to be kept each day. Trout and grayling are limited to three per licence with a minimum length of 45 cm. Fishing from June 1 through August 31. Trout and char in the Hocksjö lakes is by agreement.

Other activities

Guided tours to experience the amazing natural setting, perhaps to see beaver, otter, golden eagle or a nesting osprey. Within a radius of 30 km you can visit the Ivar Auto Museum, play golf or, in the winter, ski slalom or cross country. Or why not ride a snow scooter?

Languages

At Rörströmsälven we speak Swedish, English and German.

Additional info

We welcome anglers of all levels to our beautiful fishing waters around Rörströmsälven!

Accommodation

At Camp 1 on Lake Lesjö you will live in authentic, old, rustic timber cabins with their own kitchen, WC, shower, wood stove and sauna. There is even a restaurant. At Camp 2 we offer new, but still rustic timber cabins in the backwoods without roads. There is neither electricity nor utilities. You can either cook in the main building and in the future you will be able to order food to be served in the Nature Observatory being built at this time.
