

Fishing Package, 7 nights

Pike fishing is an all year event. But the strike periods in the vicinity of spooning in April and May are something else! There is somewhat slower fishing during the hot months of summer but in September the pike starts to strike for real again! Perch is also an all year fish but the best period for perch is late summer, early fall. Sea trout fishing begins in February and peaks in March-April. There are several rivers to choose from in the region of Blekinge, amongst them the famous Mörrum river! Big Game Fishing for Salmon and Sea trout begins in late March and reaches into June. Trolling for stationary salmon is at its best in August - September.
